To: Compusafe  
ATT: Ian Colls

Dear Ian

Our offices were broken into 8 months ago. The robbers got away with our 4 Apple Macs in under 3 minutes, not even armed response would have helped if they were super fast. One of my client put us onto Compusafe and being a bit sceptical I called Ian who came through immediately to assess the situation. After pricing burglar guards and alternative options we decided to put a Pepper Spray unit in with a bit of apprehension I must admit.

Today the unit paid itself off after the robbers came back to collect the New Apple Macs. They broke the locks off the doors and crow barred their way in to find the Pepper Spray unit waiting for them. The Security guard that was being held hostage while the others were breaking in said he heard the baddies running away coughing and screaming Pepper Spray. Ian has also bolted our Macs to the floor so they dont disappear too easily which definately helped.

We at Colour Domain highly recommend Compusafe and Ian Colls service and product knowledge .

Better safe that Sorry

Kind Regards,  
Andrew & Anja Marais
