

24 Feb 2009

Hi Ian

Our Church got broken into (again) in the early hours of Friday morning. 3 black males held up our security guard at the front doors, and proceeded to break through the front door and kicked in the Trellidor. Nothing of value was stolen, except three tins of coins we use to feed the poor in KwaDabeka!

We have very good CCTV footage of these guys, and an identikit of the faces can easily be drawn up as they never interfered with the camera's during the duration of the burglary. They drove in with a Red Golf 5 (GTI) it appears.

The footage has been sent to trellidor as they couldn't believe that the trellis could be kicked in in less than 3 minutes! The fact that no computers or TV's has been stolen is a testimony of the CompuSafe products we have started using, and will be continuing to upgrade our protection over the coming months.

Because nothing valuable was stolen in appears the SAPS aren't very interested in following up on the case...I would love these guys caught.

Kind Regards,
Craig Hildebrandt
