

Date: Wednesday 16 May 2012

Dear Ian,

We were robbed again last night and you will be glad to know that your cables worked a charm, they got away with one screen and a computer that was not locked down belonging to one of our planners. Was a nice little toffee to them coz they tried to get the reception computer very unsuccessfully. Chillsoft upstairs should be contacting you as I went and gave them your number this morning as they are going to be hit next they are a soft ware development company and have only desktops.

They broke through a mag lock and managed to unhinge our board room door leaving a fair amount of damage but we still pleased that life can still go on thanks to your cables.

Kind Regards

Cherie Metzler
