### TO WHOM IT MAY CONCERN

As can be seen from our address our business is located in a high risk area and we have unfortunately experienced several break-ins with the loss being our computer boxes.

There is no doubt that premises are monitored and even scouted in a manner which is casual and therefore undetected. Since having installed Compusafe anti theft computer box tower housings we have no further attempts as they are securely bolted to the floor and would take a long time to break away.

We, in this climate of increased theft, definitely recommend Compusafe anti theft safety products as the cost of any loss of data is frightfully costly and inconvenient.
